

Yuma International Airport 2nd Q FY24/25 Snapshot

Yuma International Airport (YIA) saw a strong rebound in passenger traffic during the last quarter of 2024, with enplanements increasing by **15.3%** and deplanements rising by **13.9%** compared to the same period in 2023.

This growth marks a significant recovery from the downturn experienced in 2023, when enplanements declined by 6.8% and deplanements by 1.0% in the second quarter compared to 2022. In addition to passenger growth in 2024, YIA managed 205 tons of cargo during the second quarter, reflecting a **10%** increase from the previous year. This highlights the airport's role as a key hub for regional transportation and commerce.

Yuma International Airport is currently served by American Airlines, offering multiple daily direct round-trip flights between Yuma and Phoenix Sky Harbor (PHX) and one daily round-trip flight between Yuma and Dallas Fort Worth (DFW).
